

AI Toolbox Waterkeringen

For digital inspection and monitoring

stowa

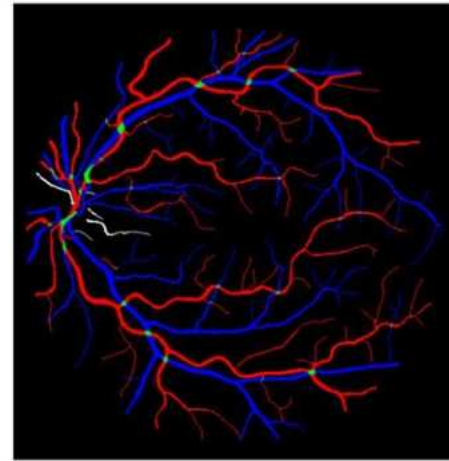

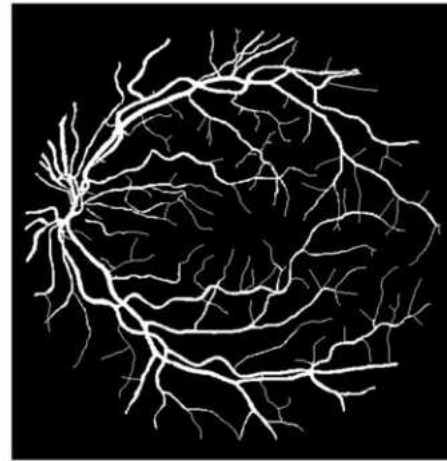

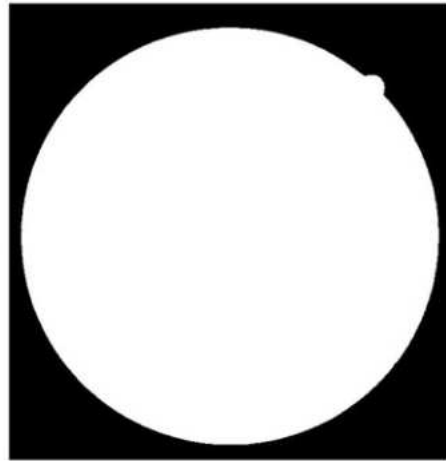

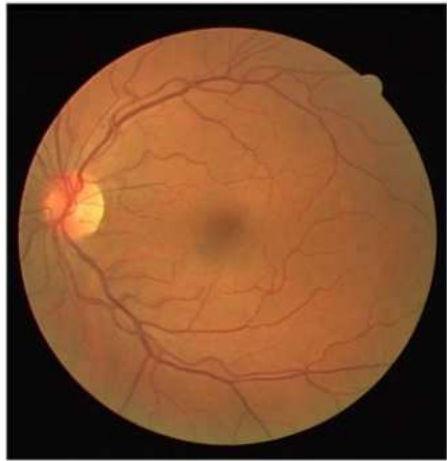

HKV

'AI is everywhere. We are all using it. All day, everyday. Whether you want it or not. How to use AI in a responsible way in the field of water?'

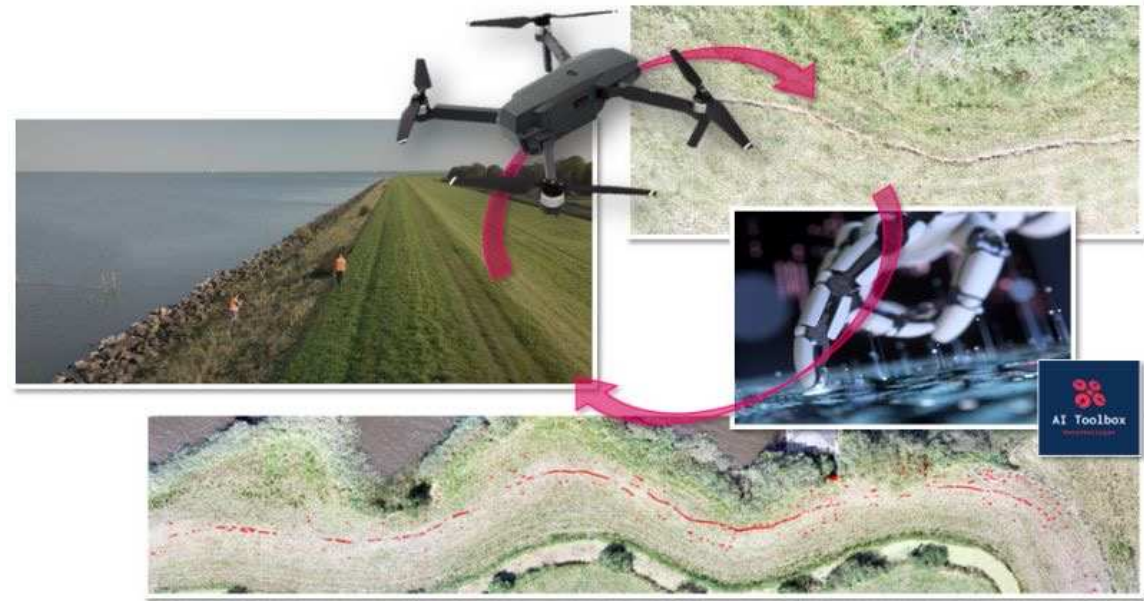

AI Toolbox

Why do we do it?

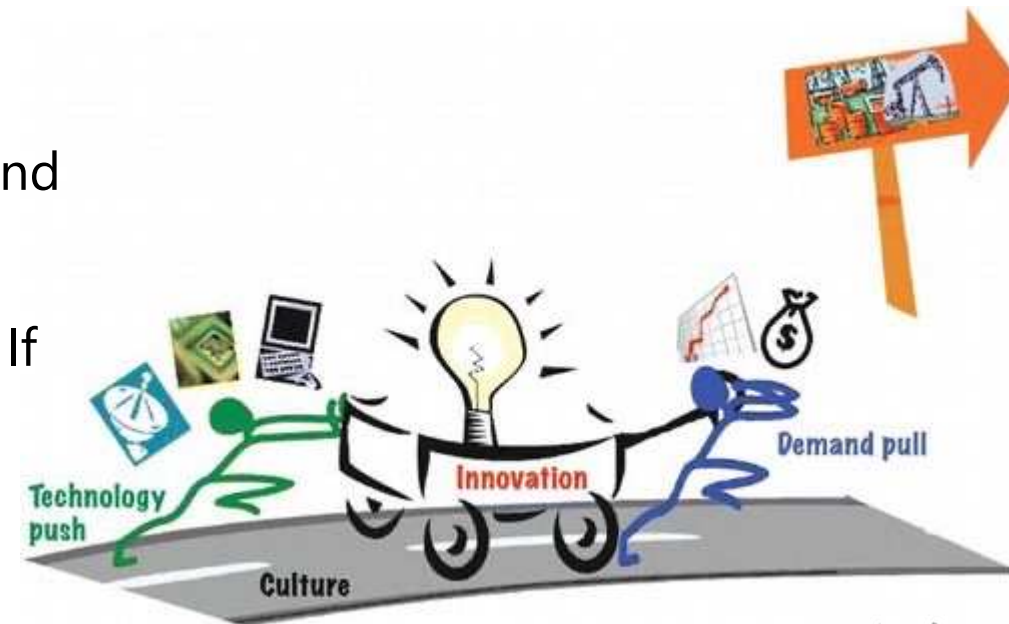

- We inspect **thousands** and **thousands** of km's levees every year.
- We are more and more interested in **differences** of **conditions** on levees.
- **Inspections** are very **labour intensive**.
- Manually recording and processing of those damages **costs** a lot of **time** and **effort** (and works on your nerves)

AI Toolbox

Why do we do it?

- Developments on AI are **moving fast**.
- Water boards also use **more** and **more AI**.
- We have to get used to working with those new tools to find **responsible ways** of **implementation**. (it is here to stay)
- This could truly **help** inspection and monitoring of levees. If we know how to use it.

AI Toolbox

How do we proceed?

AI Toolbox

How do we proceed?

1. Development of other applications
2. Open source location for algorithms and data for training
3. Learning on how to work together?

AI Toolbox

How do we proceed?

Encouraging you to pioneer with us!

To build this together.
