DigiShape is een Open Innovatie Platform

Versnellen van de digitale transformatie

DigiShape is een open innovatieplatform van bedrijven, kennisinstellingen en overheden die samen de potentie van digitalisering voor de watersector willen benutten.
Toepasbaar maken van nieuwe kennis

We werken samen aan concrete projecten, waarin we als een open community experimenteren met beschikbare data, nieuwe data en geavanceerde technieken.
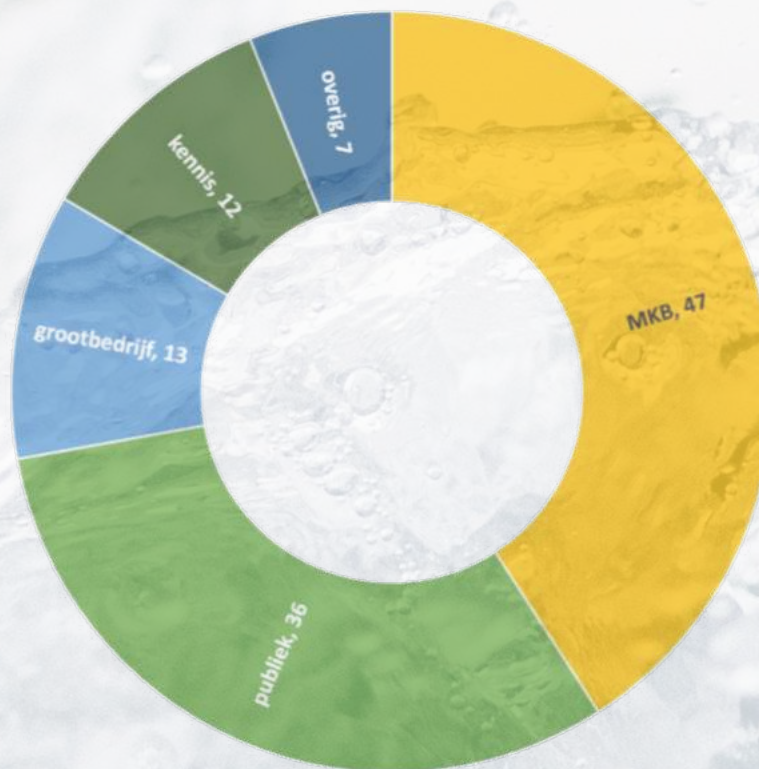

Problem Owners

SMEs, Enterprises, Government Agencies

Open Innovation Platform
Virtual platform that connects and matches challenges of Problem Owners to a pool of Problem Solvers

Innovative Ideas, Products & Solutions

Problem Solvers

Innovators, Start-Ups, ICM Companies, Researchers

Wie maken DigiShape?

De kracht van de community!

DigiShape community (150 organisaties)

- overig, 7
- kennis, 12
- grootbedrijf, 13
- publiek, 36
- MKB, 47

(25% niet-watersector)

Hoe werkt DigiShape?
Thematic areas

Water & Logistics

Watermanagement

North Sea spatial planning

Precompetitive proposition (s)

- Experimental environment (living lab) with an open data for twinning tactical and operational models: a safe environment for developing novel solutions

Sharing of models and data

- Datalake in which data from one or preferably multiple waterboards is brought together; open for experimentations. We bring the projects to the data.

Strategic network expansion

- Waterboards (and/or STOWA, Waterschapshuis, IHW)
- Active involvement of AI partners through NL-AIC
